DECEMBER 1894.

THE remains of Henry Melvin, formerly a bandsman in the Brechin Detachment of Volunteers, were interred with full military honours on 1st inst.

At the Martinmas Feeing Market, foremen were engaged at £18 to £21, 10s.; first horsemen, £17, 10s. to £19; second men, £16 to £18; halflins, £10 to £15.

A second Board of Trade inspection of the Forfar and Brechin Railway was made at this time, and considerable impatience was shown, on the part of the community, at the long delayed opening of the line.

The annual social and dance of Maisondieu Lodge of Ancient Shepherds, came off brilliantly on 7th inst.

A large electric lamp, erected at St. Ninian Square by the town, the electricity to which—equivalent to 1000 candle power—is generously supplied free from Denburn Works, was lighted up for the first time early this month. The lamp will be a boon and a blessing to the many comers and goers at this part.

Mr. J. C. Murray, organist, assisted by several ladies, gave a much appreciated chamber concert of classical music on 7th.

Mr. R. Marsden was engaged as instructor to the Brechin Brass Band.

A party of ladies and gentlemen gave a highly appreciated amateur representation of "Over the Garden Wall" and concert on 15th, for behoof of the Horticultural Society.

From a sale of work on 17th, to complete the furnishings of the Parish Church Hall, the sum of $\pounds 48$, 10s. 11d. was realised.

A number of claims by parties for damage to their houses by flooding through overflowing of public sewers were dealt with by the Police Commission.

There was some feeling manifested by business men at the resolution of the postal authorities to remove the post office from the business part of the city to Panmure Street, and efforts, without avail, were made to prevent this being done.

After a fair trial of "tar macadam" for paving, it was found that for footpaths it was all right, but for crossings it was deficient in durability.

The Town Council resolved that the town treasurer, as chamberlain, find a fidelity guarantee to the extent of £300.

The income of the Brechin Infirmary for the year was ± 520 , 15s. 84d.; expenditure, ± 724 , 4s. $2\frac{1}{3}$ d.; deficiency, ± 203 , 8s. 6d. The invested funds of the Infirmary stood at ± 4990 , 12s.; Dispensary, ± 773 , 4s. 11d.; total, ± 5763 , 16s. 11d.

The Brechin Mill and Factory Operatives' Union resolved that fire and break-down allowance be included in the rules.

A large party of emigrants left Brechin en route for New York on 15th.

The annual social of the employees of the "City Press" and Stamp and Tax Office on 13th was a most enjoyable function. Mr. W. Anderson performed the duties of chairman with considerable credit to himself and all concerned. The most interesting feature of the evening's enjoyment was the rendering of that beautiful piece, entitled "Joe, the Ostler," which was done with true dramatic fervour by Mr. G. S. Farquharson, Brechin's world-famous elocutionist.

The grant earned by Damacre Road School was the large amount of $\pounds 446$ 9s, and that of Union Street School $\pounds 140$ 9s 11d. Reports on both schools were very satisfactory.

The Shepherds' dramatic corps gave a very realistic production of "Sudden Thoughts" and "Stage Struck" to a large attendance of the public on 15th.

The question of disposing of the old Town Hall was delayed by the Town Council pending the completion of the consolidation of the town's debt.

The question of not reappointing Mr. Foster as Burgh Assessor cropped up at the Town Council's monthly meeting, which, however, was relinquished for a resolution to enjoin Mr. Foster to give more attention to the work.

A donation of £15 was voted from the Town's Improvement Bazaar Fund toward the cost of removing the Dalhousie Fountain from the West Port to St. Ninian's Square.

From the great charity demonstration held for behoof of the Infirmary and Victoria Nursing Association, the net sum of £90 was realised.

The postal officials on 7th took up their permanent quarters in the handsome building in Panmure Street erected as a post office.

A new club room, as the headquarters of the Unionist organisation in Brechin, was inaugurated with a conversazione on 2nd, when there was a brilliant assemblage and brilliant speaking.

The Directors of Brechin Infirmary intimated to Brechin District of County Council at sederant of 8th October that the arrangement for accommodation of patients from the district would close on 24th March for want of room in the institution.

For the quarter Nurse Lyon of the Victoria Nursing Association had made a total of 484 visits.

On Sunday 20th the large collection of £167 0s $4\frac{3}{4}$ d was made at three diets of worship in Maisondieu U.P. Church for the purpose of clearing off £120 of debt; which was thus accomplished and a balance over.

The annual lantern parade of the Brechin Cycling Club, on the evening of 16th, was a fine fantastic show, witnessed and enjoyed by many.

A Women's Unionist Association for Brechin and District was formed on 22nd, with a large membership to start with.

After much discussion at the Parish Council anent the incidence of local taxation, it was agreed by a vote of 8 to 5 to allow the matter to lie on the table on the ground that "they had not sufficient brain power to understand the question."

During this month a splendid new organ was crected in the West Free Church for congregational purposes.

At the half yearly meeting of the Brechin and Edzell Railway Company, the contractor intimated that he expected the line would be ready for goods traffic before 1st January, 1896, and shortly thereafter for passengers.

The angling on the South Esk during the season was fairly good but "nothing phenomenal."

At the annual conversazione of Lawn Tennis Club on 30th, a goodly turnout tripped the "light fantastic" with vir till the small hours of next morning.

A very interesting lecture, with limelight illustrations, on the subject of the "Martyrs and Heroes of the Scottish Covenant," was delivered in the City Road U.P. Church on 30th by Mr J. D. Duthie, London.

Lodge St. Ninian's of Free Masons met for the first time in their newly acquired and finely docorated lodge-room on 31st. It was just 100 years previous to that date that the lodge appointed a committee to look out for a suitable site for a hall !!

NOVEMBER.

THE "ever genial" J. L. Toole paid a visit to Brechin on 4th, and gave a production of "Thorough-Bred" and "Podgers" in the City Hall to a crowded audience. After the play was over J. L. was entertained to supper by the Brechin Amateur Dramatic Club.

The cycling assembly in the Mechanics' Hall on 8th was a great success, both as regards brilliancy and beauty, as well as by the big turn-out of wheelmen, who whirled their fair partners at a high-geared speed till the small hours of next morning.

Tom Mann, in a stirring lecture in the City Hall on 9th, expounded to a large audience "Why working-men should join the Co-operative Movement." Tom's ideas of co-operation were apparently quite diverse from those who run the Brechin dividend mills, but he was all the same appreciated.

The Parish Council, at a special meeting, adopted plans of a proposed extension of the cemetery, ground for which had been purchased at Smith's Bank by the Parochial Board, before demitting office, at the beginning of the year. At the same meeting a resolution that one of the conditions of contract for laying-out the cemetery be that the minimum wages be $4\frac{1}{2}d$ per hour was passed. This led at a subsequent meeting to unseemly conduct on the part of certain of the members, who went the length even of swearing about it.

By the explosion of part of one of the boilers of the Paper Mill on the 9th one of the firemen, William Sheriff, was so severely scalded with the escaped steam that he succumbed to his injuries a few hours thereafter.

Although municipal election matters presented a smooth surface there was a strong under current of feeling, caused evidently by an intense desire on the part of a section of the Council to oust, or rather prevent, the return of a retiring member, who, although serviceable, was more frequently obstructive than judicious in his conduct at the board. The result of it was that that member returned not. There were five candidates for the four seats, and the polling was—Alex. Annandale, 608; G. Cumming, 545; D. Murray, 502; M. Beaton, 493; Wm. Jamieson, 439.

The annual balance-sheet of the East Mill Company (Limited) showed the regrettable result of a total loss of £1551 2s 4d on the year's business.

Miss Imandt, one of the *Dundee Courier's* lady correspondents, who recently made a tour of the world, gave a very entertaining lecture on her journey, in the City Hall on 14th, for behoof of the Brechin Infirmary and the Victoria Nursing Association.

The cost of printing this year's valuation roll of the burgh was £13 16s, as per estimate.

The Local Government Board sanctioned the Police Commission's resolution to adopt the Notification of Diseases (Scotland) Act.

A splendid organ of 918 pipes having been erected in West Free Church the inauguration took place on 15th, when selections on the instrument and concert of vocal pieces was also given to a large audience.

F. B. PATON OF CAIRNBANK.

MR PATON was the eldest son of Provost George Paton, who was one of the original members of the now well known firm of Messrs J. & G. Paton, millspinners. His late father along with his brother. Mr John Paton, might be said to have, in a large measure, established the millspinning business in Montrose. He was born in 1815 on the day when the bells in the old steeple rang out a joyous peal on account of the victory at Waterloo. He received his education at the Montrose Academy, and when a young man went out to India and became a partner in a leading firm of merchants in Calcutta. Possessed of great natural business faculties Mr Paton proved himself a most valuable partner of the firm, and in what may be looked upon now as a comparatively short period earned such a competency that he was able to return home early in the 50's. On his return to Montrose he married the eldest daughter of Surgeon Major Craigie, H.E.I.C.S., and took up his residence at Turin House, Aldbar, and afterwards at Bellevue, Hillside. He also acquired the estate of Aucharroch, Kingoldrum. and improved that estate very much by planting. He disposed of it in 1878, having previously succeeded to the estate of Cairnbank, near Brechin, which formerly belonged to his relative, Captain Edward Whyte Smith, of the F. and K. Militia Artillery. He was long. one of the Directors of the Montrose Royal Lunatic Asylum and Infirmary, in the management of which institution he took a deep interest, and for a considerable length of time occupied the important position of Convener of the House Committee of the Asylum. A pleasant feature in the deceased's character was the universal courtesy which he extended to all classes of the community. He died after a short, but severe illness on 21st December, 1893, aged 80.

WILLIAM MITCHELL.

For the long period of forty-six years Mr Mitchell occupied the same premises in St. David Street as a shoemaker, doing a quiet, but substantial old-style business, and through all these years that he has gone in and out, he was ever the same in life and in character—quiet, industrious, shrewd, and circumspect, always pursuing the even tenor of his way. He was no boastful man, but one who took his place steadily and yet with purpose unflinching in the storm or sunshine of life. He had convictions, formed in knowledge and reason, and these he stood by through evil and through good report. These characteristics were marked during the time he held office in the Town Council. He was the oldest established tradesman in Brechin at the time of his death, which occurred on 3rd February, 1895, at an advanced age.

The Brechin Almanac and Directory for 1896.

DR. JOHN MACKIE.

DR. MACKIE was a native of Brechin, his father being the late Dr. Mackie, who died in 1889. On completing his education here he proceeded to Edinburgh University, where he studied medicine, and graduated as M.D. and L.R.C.S. in 1863. He then proceeded to Southampton, where he acted as assistant to a resident medical man for about a year, when he returned to Brechin and entered into partnership with his late father. He rapidly gained for himself a high reputation as a skilful physician and surgeon. By his earnest, active, and unwearied attention to his duties, and keeping abreast of his arduous profession, he very soon gained the entire confidence and esteem of all classes, and his father was relieved of his more exhausting duties. Indeed it is not too much to say that he became one of the best known medical practitioners throughout the county, and many came from considerable distances to consult him in cases of a serious nature. The good old practice gradually grew so large that the services of an assistant were found necessary, and ultimately a partner. Dr. Mackie held several important public offices. He was medical superintendent of the Brechin Infirmary, was medical officer of the burgh, and also parochial doctor for several of the parishes in the district. He was an officer of the 2nd Angus Volunteers, holding the rank of Surgeon Lieut.-Colonel. Besides being a skilful doctor, he was possessed of no mean talent as an artist, and at various bazaars and other functions in the Ancient City most creditable specimens of his artistic work were disposed of. He had also considerable literary ability, and many will remember the able, clear, attractive and instructive lectures he delivered in connection with the ambulance classes. He died suddenly on 24th March 1895, in the 53rd year of his age.

B. M. BISSET, V.S.

MR. BISSET was a native of Brechin, being a son of the late James Bisset, innkeeper and V.S., Market Street. He received his early education in Brechin, and served an apprenticeship with Mr. Hodgeton, chemist, and afterwards for some time followed that profession in Edinburgh and Bo'ness. Later he resolved to qualify for practice in veterinary surgery, and with that object in view he entered Dick's College Edinburgh, where he prosecuted his studies under the able tuition of Professor Dick, and in due course passed, and received the diploma of M.R.C.V.S. He then, in 1864, commenced practice in Brechin and district. Soon after he met with a serious gun accident, which deprived him to a great extent of the use of his right hand. On the death of Mr. Taylor, V.S., he took over the blacksmith business carried on by that gentleman in City Road, which Mr. Bisset had continued for 27 years. In his V.S. practice Mr. Bisset had for a considerable number of years been efficiently assisted by his brother, Mr. James Bisset. As already indicated Mr. Bisset was recognised as a nost skilful surgeon, and, rising to eminence in his profession, he enjoyed a practice which extended over a wide district. After a protracted illness he died on 1st May 1895, in the 50th year of his age.

J. C. INVERARITY

WAS a native of Brechin. For eighteen years he had been in the employment of Messrs C. & W. Anderson, for the greater portion of that period holding the position of cashier, and for a considerable period was inspector of poor for Stracathro. During the winter Mr Inverarity had a severe attack of influenza, and had recovered to some extent, but subsequently caught a chill, and removed to Lethnot for the benefit of a change only a few days previous to his death, the end coming somewhat suddenly. He was secretary of the Brechin Cricket Club, and was a first-class player. He was treasurer of the United Co-Operative Society, and took a great interest in temperance matters. He was also the prime mover for several years in the Saturday evening entertainments, and in recognition of his unwearied efforts was presented with a handsome marble timepiece. Of a quiet and loveable disposition he endeared himself to all, and gained for himself a large circle of friends. He was 40 years of age at the time of demise, which occurred on 26th June, 1895.

REV. HUGH AIRD, D.D.

Was born in Glasgow on 3rd November, 1824. After receiving a fair education he was apprenticed under a firm of upholsterers, Messrs White & Son, Glasgow, serving with them from 1837 to 1844. At the close of his apprenticeship he attended classes at the Anderston College and Glasgow University from 1844 to 1851, graduating M.A. in the latter year. At Glasgow he was a prize man in moral philosophy, and after being a session at a German University and completing his Divinity course, he was called by the City Road U.P. Church, Brechin. Dr Aird preached his "trial" discourse before the U.P. Presbytery of Arbroath in Brechin on Tuesday, 16th January, 1855, the ordination took place on Wednesday the 31st, and of those who took part in the proceedings our deceased friend was the last survivor. He was introduced on the following Sabbath by the Rev. Mr (afterwards Dr) Ker of Glasgow, and preached his first discourse in the afternoon. On the occasion of his semi-jubilee (29th November, 1879) Dr Aird was presented with a purse of sovereigns and an illuminated address by his warmly-attached congregation. On 26th April, 1889, the Senatus of Glasgow University conferred on him the degree of D.D. in recognition of his scholarly attainments and his abilities as a commentator, which were widely acknowledged. The Doctor ever took an energetic, warm, and practical interest in all local affairs. He was for six years-from 1873 to 1879-a member of the Burgh School Board, holding the office of Chairman during the latter three years. In the Parochial Board he also did much good work : he was Chairman of the Brechin Savings Bank, and was the first to promote, by practical and powerful speeches, the principles of co-operation in Brechin. He had been enjoying a holiday at Forres, where, on Sunday, 1st July, 1895, he officiated for the Rev. Mr Watson, apparently in his usual health. At the end of the service he was taken ill, and gradually becoming worse he was, on 11th July, removed home to Brechin, where he died on 18th, aged 70 years.

JAMES BAXTER, BUILDER,

WAS a native of Brechin, being son of Mr. John Baxter, for long a builder in the city. He received his elementary education in his native town, and afterwards served an apprenticeship with, and learned the profession of, his father. On the latter resolving to devote the whole of his attention to farming, Mr. James took over the extensive building business on his own account. Mr. Baxter was a thorough and painstaking tradesman, and enjoyed the fullest confidence of all with whom he had business connection. His knowledge of architecture -ancient and modern-was remarkable, and having read and studied carefully and widely, he was able to apply his knowledge to good pur-He carried out numerous important contracts throughout the pose. district, and only some weeks before his death he was announced as being the successful contractor for the large additions to Sunnyside Asylum. He had for a considerable time been in rather poor health, and latterly getting weaker died on 17th July 1895, at the age of 41.

THOMAS NICOLL

WAS born in the parish of Menmuir in 1805. He learned the blanket weaving when quite young at Inveriscandy Mill, and afterwards went to Galashiels. He then settled in Brechin in 1840 as salesman in the Co-operative Association. He was married in 1842 to Mary Skea, a farmer's daughter, at Montboy. A short time after his marriage he became manager of the refreshment rooms for working men in Union Street, which he carried on successfully for 12 years. He then started business as grocer in St. Mary Street, and from which he had retired for a considerable period after having acquired a competency. Mr. Nicoll was a real old merchant of the old school, and was very frequently to be seen behind the counter in a striped Kilmarnock night cap, but was a conscientious dealer in all respects. Those who wanted a real good article could depend on getting it from "Tammas" at a good price all the same. He was a most unobtrusive man in all things, but had a keen eye and ear to all that was going on, and could draw a sound inference therefrom. He was possessed of a fine cheery, pawky manner of expressing himself, and, moreover, being possessed of a wide knowledge and intelligence a "crack" with Tammas, as with one belonging to a past generation, was a treat to be enjoyed. He was a staunch supporter of the Auld Kirk, and in fact was the oldest member of the Kirk Session. He died on 9th August 1895, at the great age of 90.

JOHN MACKAY

WAS a native of Arbroath, although for long resident in Brechin. In his youth he served in the Royal Navy, and had seen some active service, having been with the Baltic fleet under the command of Admiral Sir Charles Napier during the Crimean War, and took part in the capture of Bomarsund. At the time of his death he held the appointment of bell-ringer and "minister's man" at Brechin Cathedral. His death was the result of an accident which occurred on 7th December, 1895.

#### OF THE

## TOWN OF BRECHIN.

## PRINTED AND PUBLISHED BY

## T. COLQUHOUN, 29 HANOVER STREET,

## EDINBURGH, 1828.

BRECHIN is a royal burgh, in the parish of the same name, in Angusshire, of which Forfar is the county town, and was anciently an episcopal see. It lies  $12\frac{1}{2}$  miles north-east of Forfar, 8 west of Montrose, 25 south of Stonehaven,  $26\frac{1}{2}$  north-east of Dundee, and  $71\frac{1}{2}$ miles from Edinburgh.

It is situated on a rising ground (whence its name) which is washed by the river South Esk. It consists of one street up the face of the acclevity, another nearly at right angles, and it has a third from the west adjoining, with some bye lanes. The royalty extends from the cross about half-a-mile in every direction, and the suburbs a considerable way farther. To the south and east are the *Tenements*, which are two streets of some length, independent of the burgh of Brechin, being without the royalty, and held in feu of Sir James Carnegie of South Esk.

Brechin is a well-built town, and contains a number of good houses; those lately erected are handsome. The town is well supplied with water, by means of leaden pipes. At the lower end of the south, or Nether Tenements, is a stone bridge of two large arches over the South Esk. The town had many years ago been walled round, as the names of South; West, and North Ports, still indicate. It was twice destroyed by fire, by the Danes in the year 1012, and again by the Marquis of Montrose, in 1645.

A bishop's see was founded here by David the First in 1140, richly endowed. That part of the cathedral which still remains, is an ancient Gothic pile, supported by twelve pillars, and having a door and window in the west end, of curious and beautiful workmanship. When entire it was 166 feet long and 61 feet broad. At the north-west corner is a square tower, with a handsome spire, together 120 feet high. The present parish church occupies the west end of the cathedral, which was some time ago repaired at very considerable expense, and makes an elegant place of worship.

Adjoining to the church on the south-west, is one of those round towers, of which this and another at Abernethy are all that remain in Scotland. Antiquarians have long been divided in their opinions concerning the time when these towers were erected and their use. One conjecture is that they were watch towers, several suppose them to have been belfries, whence the criers summoned the people to prayers, while not a few, knowing that similar towers are to be found in Ireland, named the land of sanctity, think that they must have been places in which penitents were confined till restored to the bosom of the church. This tower contains four openings or windows at the top. directed to the four cardinal points, and commands a tolerably ex-That at Abernethy overlooks the Firth of Tay and part tensive view. of the valley of Strathearn, and this at Brechin is directed towards the great valley of Strathmore. The conjecture that these were watch towers is but ill supported, the view from the tower of Brechin is very limited, extending only to Montrose on the east and a short way into the valley of Strathmore, neither is the view from the tower at Abernethy very extensive.

The tower at Brechin is a circular column of great beauty and elegance, 80 feet high, with a kind of spire or roof, 23 feet additional, of an octagonal form, making the whole height 103 feet, the diameter at the base is 16 feet. The building consists of 86 courses of stone. not regular in their depth, some of them measuring 24, some of them only 9 inches, and the stones somewhat deeper at one end than the other, so that the courses bear some resemblance to a screw. This fabric has sustained little injury from time. The door is about 6 feet from the ground, 22 inches wide and 61 feet high, the sides are formed of large blocks of the same sand stone, of which the rest of the tower is built. Nearly in the centre of each stands a human figure on a kind of bracket, supposed to be one of the apostles, having a rod or staff in The lintel is another block of sand stone cut into a semihis hand. circular arch, over the centre of which stands the figure of our Saviour stretched on the Cross, whence has arisen the probable conjecture that this tower was built after Christianity had been introduced into Scot-The sole is another block of the same kind of stone, on each land. end of which are the figures of two animals, conjectured to be a lion and a lamb, the whole entrance is ornamented with two borders of small circles, which surround the figures described.

In a lane at the upper part of the town are some remains of the chapel of Maison Dieu, an hospital founded by William de Brechin, and confirmed by James the Thirà in 1477, part of the revenues of which are still applied by the magistrates, its patrons, towards the support of the poor, and part to pay the salary of the master of the grammar school, called Preceptor of Maison Dieu.

Near to the town stands Brechin Castle, the ancient seat of the family of Panmure, and residence of the honourable William Ramsay

Maule. It was built in 1711 on the brink of a perpendicular rock overhanging the South Esk, and erected on the site of the old castle which sustained a siege of 20 days, in the year 1303, by the English army under Edward the First. Notwithstanding every effort used to compel the besieged to surrender, the brave governor, Sir Thomas Maule, held out till he was killed by a stone thrown from an engine, when the place was instantly given up. A descendant of this brave man was, in 1616, created Lord Maule of Brechin and Earl of Panmure. The estates and title were attained in 1715. While the property is again in possession of the family, the Peerage has not yet been restored.

Brechin is governed by a provost, two bailies, a dean of guild, treasurer, hospital master, convener of trades, a trades councillor, and five ordinary councillors. It has six incorporated trades, and joins with Aberdeen, Aberbrothick, Montrose, and Bervie in returning a member to Parliament. Brechin is a presbytery seat. A town court is held in it every Wednesday, and a Justice of Peace court on the first Wednesday of every month.

Three new schools were erected a few years ago by subscription, one for the languages, taught by the preceptor of Maison Dieu, of which the crown is patron, another for the parochial school under the patronage of the heritors and magistrates, and the third for the mathematical department.

Besides the church belonging to the parish there are in Brechin two episcopal chapels, two meeting houses belonging to the united associate synod, one for the anti-burghers who refused to unite, and one for a, very few methodists.

Two works have long since been established here, in which yarn is bleached on chemical principles, and these are carried on with such activity that 10,000 lbs. are whitened at each in the course of a week. Streams from the South Esk turn, at the lower extremity of the town, two mills for spinning linen yarn, one of which contains 16 frames and the other 26, besides flour and other mills.

One distillery of considerable extent established here has attracted notice by the superior quality of its whisky, and operations are about to be commenced in another.

A porter brewery is also carried on here with success, and a tanuage; but the business which occupies far the greater part of the working classes in this place is the manufacture of coarse linens, the yarn of which has previously been bleached. This branch of trade is managed here, in favourable times, as in the other towns in Angus, with great and increasing activity.

A branch of the Dundee Union bank, and one of the Montrose bank, is established here.

The weekly market is on Tuesday, and there are three great fairs held every year, viz., on the third Wednesday in April; the second Wednesday in June, called Trinity fair, the greatest in the north of Scotland for sheep, cattle, and horses; and on the second Wednesday of August. Besides these, a market is held on the Tuesdays after each term of Whitsunday and Martinmas for hiring servants. There are horse markets on the last Tuesday of February and all the Tuesdays of March, and cattle markets each Tuesday during winter. The population of the town in 1821 was 4520, since then it has con-

siderabiy increased. Latitude, 56° 40' north, Longitude, 2° 18' east.

Population, town and parish, 1811, was 5559.

BY

## Ex=Bailie Brother ANNANDALE,

READ AT ST. JOHN'S FESTIVAL,

27th December 1895,

On the occasion of the Portrait of BROTHER the HON. C. M. RAMSAY being presented to the Lodge.

> Saint Andrew's nicht ower a' the warld Brings memories dear to masons free ; Sae lat us in oor mirth this nicht Mind absent freends ayont the sea.

> As year by year this nicht comes roond— What tho' some vacant chairs we see— It shows the Architect Sublime

Aye visits Number 123.

Tho' silent voice and vacant chair Wi' tears may sometimes dim the e'e, They stir the tender thochts within, An' mak' us better masons be.

Some brethren hae but life begun, An' some hae seen three score an' three ; We'll happy be tho' auld or young, If true to Number 123

We a' upon the level meet, An' a' oor actions plumb maun be ; We aye pairt fair upon the square To meet again in 123.

## The Brechin Almanac and Directory for 1896.

Mony a nicht we've happy been, Happier nichts there cudna be; Tho' oceans wide oor paths divide, We'll fondly mind on 123.

We'll wish success to masons true, An' lodges a' faur ere they be ; But aye St. James abune them a', Oor mither, Number 123.

In fancy's car we wander far ; We'll tak a trip accross the sea, An' be in time for auld lang syne, An' end the strain in 123.

This Poem was originally intended to have been read on St. Andrew's Night, but owing to the presentation which was to take place on St. John's Night it was postponed till then.

The brethren of Lodge St. James (No. 123) celebrated the Festival of St. John in their Lodge, Church Street, on Friday evening, 27th December 1895. Brother Cameron, P.M., occupied the chair, and Brothers Eggie and Middleton, the newly installed R.W.M. and S.W., acted as croupiers. After partaking of an excellent supper purveyed by Brother Wood, of the Dalhousie Hotel, in his usual first-class style, a lengthy and varied programme of songs, readings, and recitations was carried through. The most important event of the evening was the unveiling of a splendidly enlarged photograph of Brother the Hon. C. M. Ramsay, subscribed for by the brethren of St James as a mark of the esteem in which he is held by them, while a similar one, presented to the Hon. Mrs Ramsay, was hung in the Lodge for the evening, previous to being transferred to Brechin Castle. The Chairman, in the course of his remarks, mentioned that the Ramsay family had been closely connected with Masonry for nearly a century and a half. In 1767 the eighth Earl of Dalhousie was Grand Master of Scotland ; in 1804 the ninth earl filled the same position; in 1808 the Hon. W. Ramsay Maule, afterwards first Lord Panmure, was Grand Master ; in 1836 Lord Ramsay, afterwards tenth Earl of Dalhousie and first Marquis of Dalhousie, was Grand Master ; in 1867-79 Fox Maule, eleventh Earl of Dalhousie, was Grand Master, and it will be in the recollection of many that the late earl held the high and responsible position of Provincial Grand Master of Forfarshire, 1876-80. Brother Annandale, in supplement to Brother Cameron's remarks presenting the portrait of Brother the Hon. C. M. Ramsay, mentioned that to complete the chain

THE inventor of clocks is not known. The obscurity is owing to the fact that the Latin word for clock may signify any mea-surer of time, not excepting even the sundial. Watches are genesurce of time, not excepting even the sun-dial. Watches are gene-rally stated to have been invented by Peter Hule, of Nuremberg, in 1500, who first made "a clock without weights." In the strict acceptance of the term, all clocks must strike. When the clock is not made to strike, it is a time-piece: but the distinction no longer holds.

#### WORDS OF THE WISE.

MAKE life a ministry of love, and it will always be worth

and to will characterize and to will characterize and the state of life is most happy where superfluities are not required and necessaries are not wauting.

THE leading motive in the najority is vanity, the highest virtue domestic affection. MODERATION is like temper-ance: we should wish to eat more, butare afraid of injuring our health our health.

#### NOTES TO THE CALENDAR.

If evil come not, then our fears are

vain, And if they do, fear but augments the

1.-Laus Deol was the first entry by merchants and tradesmen of our forefathers' days in beginning their new account hooks with the New Year.

3.—Rachel the actress was cold and very unamiable. Heracuteness and force of character cannot be too highly extolled. She kept aloof from her fellow-actors, and cared nothing in the world for stage business

She filled the stage completely. The audience cared nothing for the The addience careful forthing for the play when she was not on, and talked as if it were between acts. At her entrance all noise ceased, and her impassioned eloquence thrilled and carried the feelings of the audience. carried the teerings of the audience. The other actors were disheartened, and dared not receive any honours for fear of heing dismissed. Rachel did not care to share any of the honours.

She was extremely parsimonious. The latter quality was exemplified at a big dinner that she gave to some aristocratic guests. Knights,

some aristocratic guests. Knights, courtiers, and the highest in the land were present. Pineapples were very expensive and rare then. The fruit centre-piece she desired to have sur-mounted hy a pineapple, and instead of buying, sile hired one for the evening for seventy francs. Addrews merity at the when suddenly a mischievous friend wirdredit inserted a kuife into the

Hachtel was in high spirits, when suddenly a mischievous friend wickedly inserted a knife into the pineapple. The tragedienne uttered a piercing shrick; the guests rushed towards hor; when she endenvoured towards hor; when she endenvoured had a strange pain, hut that it had nassed now; passed now.

A withy poet present quietly asked: "Was the heart of Mile, Rachel hidden in that pine?" He knew her pain came from the de-struction of the pineapple, for which she would have to pay.

7.-The day after Twelfth Day was called St. Distaff's Day, or Rock was called SL Distant's Div, of Note Day, because it was celebrated in honour of the rock, which is a distaff held in the hand, from whence wool is spun by twirling a ball below. It seems that the burning of the flax and tow belonging to the women was the men's diversion in the evening of the first day of labour after the twelve days of Christmas, and that the women repaid the inter-ruption to their industry by sluleing the mischief-makers

Ing the inschier-makers. Herrick tells us of the custom in his "Hesperides":-"Partly work and partly play Ye must on St. Distoff's Day; From the plough soone free your

teame, Then come home and fother them. If the maides a-spinning goe, Burne the flax and fire the tow.

Bring in pailes of water then, Let the mailes broash the men, Give St. Distuffe all the right, Then bid Christmas sport good-night.

22.—The anniversary of St. Vin-cent is entered as *Sunbeam Day* in the "Natural Calendar," It was so called from an old proverb that it hodes good luck if the sunhcams be seen breaking out any time tobe seen breaking out any time to-day. A Latin proverbial line has it, "Fincenti festo si Sol rudiet memor esto," which has been thus rendered into English and extended :-

"Remember on St. Vincent's Day, If that the sun his beams display, Be sure to mark the transient beam Which through the cusement sheds a

gleam; For 'tis a token, bright and clear, Of prosperous weather all the year."

23.-The advice of Plutarch to the unfortunate is very ingenious and ought to be consolatory. "Con-sider," says the philosopher, "you equal the happiest men in the one half of your life at least; that half, I mean, which you spend in sleep."

26 .- The famous Lord Jeffrey was born in the upper part of a house in the Lawnmarket of Edinburgh. The house happened to catch fire at the horse happened to citch he at the time when he was only about a year old, and in the hurry and confusion the child in the garret was for a long time forgotten. When it was almost too late he was remembered. almost too late he was remembered, and an honest man, by trade a slater, volunteered his sorvices in rescuing the infant from his perilous situa-tion. With much difficulty and no little danger he was bronght forth from the hurning house and de-livered into the arms of his anxions relatives.

Thus was a life, which assuredly has been of some importance in Scottish literary and political his-tory, preserved by the courage of a poor tradesman.

30 .- The chief events of the life 33,-The chief events of the life of Charles I. are as follow:-Born in 1600; succeeded his father, James I., 1625; dissolved his third Parlia-ment, 1629; troubles in Scotland, 1637; Long Farliament convened, 1610; hattle of Edge Hill, 1632; battle of Marston Noor, 1643; de-feat of Naschy, 1645; executed, 1649.

A way in the night bawls out lustily-'Firel

" Where? where?" cry the folks, half awake and affrighted:

Quality the fellow below, "That's what I wish to know; For my pipe is gone out, and I want it just lighted."

## MONEY-MAKING ON A COLOSSAL SCALE.

MHE history of the Rothschilds, the financial rulers of nations, is a sensational story. Mayer Amschel, born in the Frankfort Judengasse in 1743, was the real founder of the firm, though his father had been a trader before him, dealing in eurosities in a small way, and travelling the country with a pack and a donkey.

Young Mayer, with the trading instinct which seems the birthright of Jews, showed more than their ordinary com-mercial prececity. A schoolboy of twelve, he was already dealing in coins and laying the foundations of a future business connection.

His father had meant him for the Church-or, rather, for the Synagogue-but the trading spirit was too strong, and he came home to settle in the Judengasse. He did not stay there long, for his reputation as a man of business recommended him to the wealthy banking firm of the Oppenheims.

They appreciated him, and he had fair prospects of advancement, but with all his caution and produce he had a dash of the adventurer, and determined to set up upon his own account. Very soon he had a variety of irons in the fire; from buying and selling curiosities and objects of art, he quickly developed into a banker and financier. He impressed all with whom he came in contact with the sense of his capacity.

A fortunate acquaintance he had formed introduced him to the Landgrave of Hesse, who intrusted him with the administration of his vast private means, and that proved the turningtration of ins vast private means, and that proved the turning-point of Rothschild's own fortunes. The Landgrave, who had made himself specially obnoxious to Napoleon, by selling his subjects into English and Prusslan services, fied before the advance of the French. The story of how he gave his treasures into Rothschild's charge has been told in many ways and with much fanciful embroidery.

The facts are simply that Rothschild managed to remit the money to his son Nathan, who was already in business in London. After the peace it was all honourably accounted for, and duly repaid-principal and interest. The probity and

ability of the Rothschilds were at once extensively advertised. But in the meantime a singularly bold and lucrative speculation had redounded still more to their credit. The Duke of Wellington, during the Peninsular campaign, had been suffering from the precariousness of specie supplies. The English Government were greatly embarrassed, for no bankers would undertake the responsibility of transmitting them.

Then Rothschild came forward, and formally undertook the contract, on a heavy commission. For eight years he is said to have cleared £150,000 annually, and his success may have been due to the international relations he had already established. Be that as it may, he gained the confidence of our Government, and the consequence was that he had the profitable charge of remitting the enormous subsidies to the Continental princes in our pay. When Mayer Amsehel died, like one of the old patriarchs

he summoned his five sons to his death-bed to give them his blessing and his best advice. The advice was to remain faithful to the Jewish law, to remain united to the end, and to do nothing without consulting their mother. "Observe these three points," said the dying capitalist, "and you will soon be rich among the richest, and the world will belong to you." The sons fulfilled to the letter the precept that enjoined

harmonious combination; till lately they kept all their money in the family by intermarrying. But they achieved their In the family by meeting in the table table and the family by meeting by separating new centres of activity in some of the chief capitals of Europe. While the eldest son remained in Frankfort, his four younger brothers were directing houses in London, Paris, Naples, and Vienna,

#### WORDS OF THE WISE.

THE hypocrite is a saint, and the false traitor a man of honour, till opportunity, that faithful touclustone, proves their metal to be false.

WHEN a true genius appears in the world, you may know him by this sign, that the dunces are all in confederacy against him.

THE things are generally best remembered which ought most to be forgot. Not seldom the surest remedy of the evil consists in forgetting it.

WE are never so well pleased with an antagonist as when he makes an objection to which we are provided with a good answer.

He had received only the ridiments of education: and though he after-wards read engerly such works as were within his reach, it is wonder-ful that he should have attained, as a speaker and writer, such a mastery of language, and a pure as well as effective scyle. At the same time, he was melan-choly, tonched with the pathos of hourn, reflective scyle. Lincolne, reflective scyle, be and was out of spirits, sometimes took the shape of fatalism. Lincoln's goodness of heart, his sense of duby, his unselfishness, his freedom from vanity, his long-suffering, his simplicity, were never disturbed either by power or by opposition. He spoke always from his own heart to the heart of the people. His hrief funcral oration of the language.

Kings and pripoces had no more terrors for him than persons of humhle rank or of no rank at all. At one time he had the honour of giving lessons in elocution to the Frince of Wales, who afterwards pecame King George IV., and his patience was much tried, for his foval pupil was far from being a brilliant scholar.

At last one day, when the Prince, according to the vitiated pronnncia-tion of the time, had been saying "oblegge" instead of "oblige," Kemble, with great disgust depicted on his countenance, said firmly :

To the world's open view .- DRYDEN.

They controlled the Bourses, as they had the ear of the Cabinets; they were called into consultation when loans had to be raised in contemplation of breaches of European peace; they are supposed to have sometimes averted wars simply by refusing to draw their purse-strings; and once, as a condition of furnishing indispensable supplies, they forced an un-welcome Finance Minister on the tyrant of Naples.

As a rule, however, they seem to have conducted their financial arrangements from the purely business point of view ; and they insured the success of their speculations and the accuracy of their cosmopolitan information by establishing agencies with leading increantile houses all over the world.

Naturally, they provoked envy and jealousies. But in their united strength and with their admirable organisation, it became difficult to compete with them and impossible to crush them. The few speculators who had the courage to make the attempt invariably had reason to repent it. The remarkable feature in the rise of the Rothschilds was

the thoroughly cosmopolitan manner of managing their business. They had no prejudices, no principles, and no patrictism. For example, "whilst on the one hand they provided supplies for the armies of Napoleon, on the other they raised loans for his foes."

Nathan Mayer, the first head of the English firm, was the ablest of the five sons. Millionaire as he was, his lot was far from an enviable one; his hot pursuit of money gave him neither leisure nor rest; he directed everything. His couriers were coming and going at all hours, and even when he retired for the night he was never sure that he might not be roused up to read and answer important despatches.

He was anything but an attractive character, as he must have been a miserable man. His disposition was not only money-getting, but grasping; on the strength of his enormons riches he permitted himself almost brutal licence of speech; by his will he did not bequeath a shilling even to those who had laboured indefatigably in his service.

His son, Baron Liouel, who inherited much of his father's business talent, impresses us more favourably. He, too, had rough and rather repulsive manners, and latterly he was racked with pain and irritated by rheumatic gout. Bat he was benevolent in the best sense of the word, and always ready to reach a liberal hand to the deserving.

Like his father, he was entirely given over to business, although, unfortunately, he did find time to catch rheumatism in the hunting-field. Like his father, he had such fath in his own powers of administration that he insisted on super-intending everything personally. But if he had the passion of acquisitiveness which made the fortunes of his family, he had the charity which covers a multitude of sins.

Baron James, who established the Paris branch, was one of the shrewdest and most eccentric members of the family.

It was what may be charitably described as his extreme astuteness which provoked the most formidable combination ever formed against the Rothschilds. The Barings, the Hopes of Amsterdam, and other important European houses, organised a syndicate which successfully contested the concession of the Russian railways.

As an admirer of the arts, he went to Horace Vernet to arrange for having his portrait painted. Vernet named 4,000 francs as the price.

The Baron tried vainly to beat the painter down, till at last Vernet threatened to treble his charge if there was another word on the subject.

"Am I to paint it, or am I not?" from the studio, thinking that the The Baron bolted

audacious artist must be mad. "Wait a moment!" cried the artist after him; "I will do your portrait for nothing.

And he painted him on the gigantic canvas of "La Smala" as a hideous-looking Jew running away with a casket of jewels and money, his face expressive of the most sordid avarice.

# A REMARKABLE ARAB CHIEF.

T is now about twelve years since the able and spirited Arab chief, Abd-el-Kader, passed away into the other world after having played a prominent part in this. A few notes on his career will be found interesting, and instructive as well, for he was a great man, from whose career not a few lessons may be drawn by those who are that way inclined.

He was the third son of a revered Marabout chief of the Massing that third solid later that about third on the province of Oran, Solid-el-Mahiddin, and was born near Massara in 1807. At an early age he evinced a precocious intelligence in expounding difficult passages of the Koran, while his skill in horsemanship and in yielding the yataghan caused him to be regarded, before he was sixteen years old, as

caused min to be regarded, below to was stated years out, as one of the most promising warriors of his tribe. An anecdote is related of him which, whether true or legendary, shows in what general esteem he was held. It is related that in his seventeenth year his father presented him with a beautiful white horse, which was much coveted by a chief named Yusuf. Proposals to buy the horse having been declined, Yusuf determined to obtain it by stratagem.

One day, as Abd-el-Kader was riding near Oran, he heard a crippled old beggar crying lamentably to him from the road-side. Night was advancing; the beggar was unable to walk, and besought the young rider in the name of the Prophet to carry him to the neighbouring town. Abd-el-Kader at once dismounted, and lifted the beggar into the saddle ; but scarcely had he done so, when the unworthy Yusuf disclosed his identity by spurring off and breaking into a loud laugh.

Abd-el-Kader stood speechless for a moment ; then, putting both hands to his mouth, he shouted after the man who had duped him : "I give you the horse! but on condition that you tell no man how you have served me. You would disgust others from doing good."

The story, of course, adds that Yusuf, being struck by these words, turned rein penitently, gave back the horse, and remained ever after Abd-el-Kader's admiring friend.

Many romances of this kind were invented about the son of Mahiddin, and they serve to explain how the Dey of Algiers took alarin at the young man's popularity, and sought to have him killed. Abd-el-Kader and his father fled into Egypt, and there the young Marabout (for he was already called by that title, which may be translated as Reverend or Saint) first made acquaintance with European civilisation, or, at least, with what passed for such at Alexandria and Cairo.

He also performed the pilgrimage to Mecca; and he had just returned from the accomplishment of this pious duty when news reached him of the French invasion of Algiers. The Dey had insulted the French Consul by striking him with a fan; and Charles X., being anxious to win a little glory for his army, had decided upon an expedition which was represented to the British Government of that day as having no territorial aggrandisement for its object. However, when Abd-el-Kader returned to his country, he found that the French were already masters there, and expressed no intention of going away.

He at once set to work to drive them out, and at the same time to break the last remnants of Turkish power in the province. The people of Oran rose at his appeal, and elected Maliddin king; but the old chief waived his own claims in favour of his son, and soon the French found it expedient to sign a treaty which recognised the latter's sovereignty over Oran.

It was hoped that he would agree to consider himself, if not as the vassal, at all events as the ally of the French; but Abd-el-Kader quarrelled with the foreigners in less than six weeks, and preaching a Holy War soon gathered 10,000 horse-men under his banner. With these he marched upon Oran, which was occupied by General Boyer, laid siege to the town, 4th Month,7 1896.

**5.**—Easter-day is distinguished by its peculiar name through our Saxon ancestors, who at this senson of the year held a great festival, in honour of the goddess *hastor*, pro-bably the *Astorte* of the Eastern nations. Others think it is so called from the Saxon Oster, to rise, being the day of Christ's resurrection. The French call this festival paques, derived from the Greek pascha and Hebrew pesech-i.c., passover, and Hebrew pesech-i.c. passover, and hebrew post to the Lamb in the Last Supper.

7.-About seventy years ago, in a city of Italy, at Bergamo, by a singular contrast, the company of the opera-bouse was quite indifferent, while the choristers were excellent. It could scarcely have been otherwise, since the greater part of the choristers afterwards become distinguished composers. and did not retire until he had repulsed three sorties of the French troops and inflicted heavy losses on them. These reverses-though the Government endeavoured to

attenuate them-created consternation in France. General Desmichels was sent to take the command from Bover : but all he could do was to vanquish some of the Emir's partisans in occasional skirmishes. Abd-el-Kader kept the field, killing more men than he lost, and so weakening the enemy by the rapidity and vigour of his movements that they were glad in 1834 to conclude a new treaty with him.

This time a regular kingdom was formed for Abd-el-Kader out of the Chelilate of Mascara, bounded on one side by the Empire of Morocco, and on the three others by the provinces of Oran, Titeri, and Algiers. The Emir was acknowledged as king absolute, and promised on his side to leave the French in undisturhed possession of the provinces which they held. He so far kept his word that he subdued several chiefs who were inimical to himself as well as to the French; but it was no part of his purpose that the French should remain in Algeria, and his only object in signing the last treaty had been to gain time.

In 1835 he was ready with a new army, and the French, who had originally undertaken the conquest of the Dey's dominions, thinking they were going to make a simple promenade militaire, found themselves obliged to send against the Emir no less than 40,000 men under Marshal Clauzel and General Bugeaud.

The war that ensued raged ten years, and cost France more in men and money than has ever been officially acknowledged. The fierceness of the struggle and the ardour which the French threw into it were shown by the fact that Louis Philippe sent all his sons to take part in the war, and the exploits of the Ducs d'Orléans and d'Aumale in particular were watched with as keen interest and chronicled in as brilliant language as if those princes had been engaged with a first-elass military power.

It must be confessed, however, that Abd-el-Kader's tactics were splendid, and entitled him to the praise which the Duke of Wellington gave him as being a captain "who with more troops and better arms would have made Algeria un-conquerable." The Emir was, in fact, only conquered by numbers, though this is said without any disparagement to be reader which the Emeral displayed for many statements. the valour which the French displayed from first to last in their terrible encounters.

In 1842 the capture of Abd-el-Kader's smala-that is, his family, baggage, and treasure-by the Duc d'Aumale, forced him to take refuge in Morocco. The Emperor of that country, Abd-er-Rahman, was notoriously friendly to him, although pretending to be neutral; and after a little while a Moorish army, commanded by Abd-el-Kader, recommenced hostilities against the French.

The war against Morocco was closed in 1845 with the bombardment of Tangier and Mogador by the French fleet bolinatanche y lange and another by the trench nece under the Prince de Joinville, and with the victory won at Isly by General Bugeaud, who, in honour of it, was created a Marshal of France and Due d'1819. But it was not till 1847, after two more years of indefaligable guerilla warfare, that Abd-el-Kader felt completely beaten and surrendered to the French.

They had promised that he should be allowed to retire into Egypt; but it was decided that he was too dangerous an enemy to be let losse, and, as Thiers remarked, "the had the honour of being treated as the English treated Napoleon." He was confined first at Pau, then in the Château d'Amboise, and his captivity only ended in 1852, when he consented to swear homage to Napoleon 111. and to become pensioner of the French Government, who agreed to allow him £4,000. Abd-el-Kader's object in making his submission seems to

have been simply the honourable one of sparing his countrymen further useless strife.

#### WORDS OF THE WISE.

To give heartfelt praise to noble actions is, in some measure, making them our own.

MARRIAGE is a lottery, in which men stake their liberty and women their happiness.

HE that has no friend and no enemy is one of the vulgar, and without talents, powers, or energy.

It is not the cares of to-day, but the cares of to-morrow, that weigh a man down,

#### ABOUT THREE FAMOUS ARTISTS.

"N the "Reminiscences" of the well-known animal painter, Mr. Sidney Cooper, we meet with many interesting particulars regarding other famous artists. One of these is Turner, of whose domestic ménage Mr. Cooper draws anything but an inviting picture.

"I called," he says, "upon Turner at his house in Queen Anne Street, and a dirty-looking house it was! There was no evidence of its having been painted for a great many years. I knocked, and knocked again, when at last the door was opened by a most frightful-looking creature-a short woman with a very large head, wearing a dirty white gown, and with a ragged, dirty thing tied round her head and throat, making a ragged, dirty thing tied round her head and throat, making her already large head twice its natural size. She locked just like those ogres one sees in a pantomine before the trans-formation scene, and was altogether a most appalling vision. I told her that I wished to see Mr. Turner if he was within. She said he was in, but she did not think he would see anyone. 'But I will go and see if he will, she added, and showed me into a small room by the entrance, where she left me. I shall never forget the damp, dirty smell of the inside of the house.'' Of another great artist Mr. Cooper draws a very painful interver. It is of Sir Edwin Landeser in his letter days. ''If

picture. It is of Sir Edwin Landseer in his latter days: "It was somewhere near Carshalton that he lived, and we went down together on a Sunday. I was indeed shocked when I saw him so changed. He was always crying out for more drink, and was to all appearance half out of his mind. He said to me: 'Oh! Cooper, you do not know how ill I have been, and still am! And they don't care anything about me; they leave me alone and do nothing to help me; they will not even give me anything to drink when I am dying of thirst." Mr. Cooper mentions seeing him again a week later, dining at the Athenæum. "He was walking about more than half boozy; his nose of a purple-brown colour, and looking altogether repulsive—like all men who are habitually intoxicated; and everyone in the place making remarks about him, either in derision or in pity.

A funny story is told by Mr. Cooper of George Chambers. "One day, when the artist was hard at work in a back room on a little picture which he had been commissioned to paint, he heard a commotion and cries of fire in the house. He ran into the bar, and found that the chimney was alight, and men were trying to sweep the soot down with a broom, but the flames had taken hold of it too high up in the chimney for this means of extinguishing the fire to be successful. George Chambers, seeing this at a glance, caught up a thick mat, and ran with it to the roof, and, elimbing up the stack of ehimneys, he put it on the top of the one that was on fire, thus stopping the smoke. As there was a stiff breeze, he sat on the chimney-pot to prevent the mat from blowing away. Suddenly, a moment after he had taken his seat, he found himself, mat, and everything dislodged, with a loud report; so he went down again to see what had happened. Then he found that one of the inmates had fired a carbine up the chimney, with a large charge of gunpowder | No one knew that Chambers had gone aloft; and when he stopped the snoke from coming out at the top, thinking that by excluding the air he would put out the fire, the snoke had come down into the room, in such volumes that the other people present were frightened, and had resorted to this measure, which effectually removed all the soot, and George Chambers at the same time.

Be wise to-day ; 'tis madness to defer ; Next day the fatal precedent will plead; Thus on, till wisdom is pushed out of life. Procrastination is the thief of time; Year after year it steals, till all are fled; And to the mercies of a moment leaves, The vast concerns of an eternal scene.

#### WORDS OF THE WISE.

THERE are two classes of people in the world-those who make fools of themselves, and those who don't need to.

You may depend upon it that he is a good man whose most intimate friends are all good, and whose enemies are decidedly bad.

IF all the people knew what they were talking about, there wouldn't be nearly so much said as there is now.

Love cannot exist in the heart of a woman unless modesty is its companion, nor in that of man unless honour is its associate.

## DANCER OF WORLD-WIDE RENOWN.

NE of the most famous of modern dancers was Maria Taglioni, who was born at Stockholm in 1804, and died only a few years ago at the age of eighty. Her father was ballet-master at some of the opera houses on the Continent, and his gifted daughter made her debut at Cassel when she was only nine years old, while Napoleon I. was still on the throne and his brother Jerome was King of Westphalia.

The exercises of a dancer nust begin when she is between seven and ten years old, and they must be carried on with daily assiduity and through terrible fatigues, until the child is shown to be physically unit, or until her limbs acquire a suppleness which, compared to those of ordinary persons, is as indiarubber to wood.

Dr. Louis Véron, who was director of the Paris Opera from 1813 to 1831, relates in his Memoirs how pitilessly severe From 1513 to 1531, relates in his demoirs now pituessly severe Philip Taglioni was in the training of his daughter. Racking headaches, overpowering lassitude, nausea, were excuses never accepted by the implacable father, who held that every day should be marked by distinct progress. Being much consulted about the organisation of ballets in the minimuch Continuent theorem. Built market the

the principal Continental theatres, Philip Taglioni travelled a good deal, and he generally took his pupils with him; but on one occasion he left Maria to continue her exercises under a famous dancing-master named Coulon, and the latter's pupils all laughed when the lean, awkward, plain-looking girl first joined their lessons. "The idea of such a little hunchback as that thinking to become a dancer !" was what these young ladics said.

She was never a beauty, though she grew in her maturity to have a pleasing countenance, radiant with intelligence-for she was very clever-and with the serenity which success brings.

The stage slang by which the French describe the elasticity of a dancer is *ballon*, or ballooning power, as to which it may be said that the word "balloon" is itself believed to be derived from Ballon, a famous dancing master of the seventeenth century. Nobody even had so much ballon as Taglioni; she seemed to fly from the stage as from a spring-board, and her superiority over all rivals lay in her being able to repeat her feats of agility so much oftener than they, and to pause on one movement for a much longer time without any apparent effort. It was her father's prime maxim that the moment effort becomes visible in a dance it ceases to be dancing, but

turns to gymnastics. When Taglioni first came out as a première danseuse at Vienna, at eighteen, her style was quite new, and afterwards in Paris it got called the "Ideal," in opposition to the old-fushioned "Realistic" taught by Gardel and the younger Vestris.

In those days the ballet was much more popular than it is The repertory of the Paris Opera between 1830 and now. 1835 always included about twenty-five ballets d'action, and it was the same at the Opera in London. But long before Mr. Lumley retired from his management of Her Majesty's Theatre he noticed that the public were growing impatient of ballets in which a dramatic action was evolved by pantomine.

Audiences inclined more and more towards the divertissement, or dancing interlude in operas; but from the time of this change in taste the race of great dancers was doomed to extinction, for it was no longer worth the while of a girl to go through the fearful apprenticeship by which a danseuse of old became perfect, if she was to have nothing more to do than dance a few figures in a divertissement. Some of the ballets in which Taglioni won her renown had three acts; in fact, singers would often complain that they were neglected for dancers, as the audience seldom filled stalls and boxes till the ballet began.

Mr. Lumley's treatment of Lola Montez in 1843 shows how

#### WORDS OF THE WISE.

A PRINCE has need but of eyes and ears; his month only serves him for smiling.

THERE are too many people who only listen to the sermon for their neighbours when they go to church.

IT is much better to endeavour o forget one's misfortunes, than to speak often of them.

I WILL envy none but a good man: I will pity nothing so much as the prosperity of the wicked.

#### HAPPINESS AT HOME.

It's no' in books, it's no' in lear, To make us truly blest; If happiness has not her seat And centre in the breast, We may be wise, or rich, or great, But never can be blest.—BURNS. high dancers used to stand upon their dignity. Lola Montez had been announced to appear as an exponent of the Spanish school of dancing. She was a lovely woman, and danced school of aancing. She was a lovely woman, and danced prettily, but there was nothing of high art in her performance; and after she had made her *debut*, drawing an enormous audience to Her Majesty's, some Spaniards in London in-dignantly protested against her being regarded as a repre-sentative Spanish dancer. Upon this Mr. Lumley apologised, saying he had been deceived, and he forhade Lola Montez to appear again. Mr. Lumley felt that he owed respect to the ladies of his corps de ballet in not allowing their art to be caricatured on his boards.

There were never so many great dancers as in the years when the ballet was on its wane. Fanny Cerito, "the charming," Adèle Dumilâtre, and Fauline Duvernay were the favourite pupils of Vestris, and the first-named exhibited in a rare degree all the seductive attributes of his peculiar school. Carlotta Grisi, whose husband, M. Perrot, was for a long while ballet master at Her Majesty's, was in Italian character dances held to be inimitable. Of Fanny Elssler it has been said that she was the only artist of the century who the open set of the and end of the set of the set of the control of the set o commanding stature and amazing strength. To these names must be added those of Rosati, and Lucile Grahn, a Dane, who figured in the famous Pas de Quatre, which was the great event at Her Majcsty's in 1845.

It was the Queen who first expressed a wish to see Taglioni, Carlotta Grisi, Cerito, and Lucile Grahn all dance together, but the matter was not accomplished without considerable difficulty. A performance had to be arranged in which each dancer should shine to her utmost and yet not be in a position to outshine to her tainost and yet not be in a position to outshine the others; and then there was the question of precedence to be regulated. All the other three dancers willingly yielded the first place to Taglioni-that is, consented that she should dance her pas seul last; but none of them would make way for the other two. At last Mr. Lumley had a really happy thought. "Let them dance by order of age," he said, upon which the ladics reddened, tittered, and allowed M. Perrot to settle their places for them. The Pas de Quatre was repeated on several nights, and created a veritable furore.

The final night of Taglioni's appearance was really the close of the era of grand ballets. Mr. Benjamin Lumley used, at the close of every operatic season, to give a great garcian *file* at his villa, The Chancellors, at Fulham; and at the last of these entertainments which Taglioni attended, in 1847, she said, seeing people flock round Jenny Lind, "La danse est comme la Turquie, bien malade."

To the end of her long life she wished regretfully that she had been born in an age when dancers had as much honour as fell to the lot of Mlle. Gnimard a hundred years ago, but the regret was no mercenary one. Though a great stickler for dignity, "La Grande Taglioni" was more accommodating in money matters than any of her terpsichorean sisters, and M. Veron mentions with admiration that having concluded in 1831 a six years' engagement with him at  $\pounds 1,200$  a year, she refused an increase of salary which he offered, saying that she had been more than paid by her triumphs. Cerito was said to have remarked on this occasion that artistes ought not to manage business for themselves, as they are apt to spoil trade.

THE utmost reach of reason is to recognise what an influity

of things go beyond it. No soul is desolate as long as there is a human being for whom it can feel trust and reverence,

THE man who is always anxious to take the chances, invariably takes one chance too

IT is hard to believe that a sin will bite when it comes to us with gold in its teeth.

His last work before retiring to bed was to receive from the chief cook the bill of fare for the next day; the price of cach dish, and of its separate ingredients, was marked in the unargin. # THE MOTHER OF SIR WALTER SCOTT.

S Walter Scott was one of many children, he could not, of course, monopolise his mother's attention; but A A probably she recognised the promise of his future greatness, and gave him a special carc; for, speaking of his early boyhood, he tells us: "I found much consolation in the partiality of my mother." And he goes on to say that she partainty of my mother. And he goes on to say that she jeined to a light and happy temper of mind a strong turn to study poetry and works of imagination. Like the mothers of the Ettrick Shepherd and of Burns, she repeated to her son the traditionary ballads she knew by

heart; and so soon as he was sufficiently advanced, his leisure hours were usually spent in reading Pope's translation of Homer aloud to her, which, with the exception of a few ballads and some of Allan Ramsay's songs, was the first poetry he made acquaintance with.

It must often have been with anxiety, and sometimes not without a struggle, that his mother—solicitous about every trile which affected the training of her child—decided on the books which she was to place in his hands. She wished him to develop his intellectual faculties, but not at the expense of his spiritual; and romantic frivolity and mental dissipation on the one hand, and a too severe repression-dangerous in its after-reaction-on the other, were the Seylla and Charybdis between which she had to steer.

The ascetic Puritauism of her training and surroundings would naturally have led her to the narrower and more restrictive view, in which her husband, ansterer yet, would have heartily concurred; but her broad sense, quickened by the marvellous insight that comes from maternal love, led her to adopt the broader, and, we may safely add, with Sir Walter's career and character before us, by far the better course.

Her courage was, however, tempered with a wise discretion : and when he read to her she was wont, he says, to make him "pause upon those passages which expressed generous and worthy sentiments.

A little later, when he passed from the educational care of his mother to that of a tutor, his relations to literature changed, as the following passage from his autobiography will show: "My tutor thought it almost a sin to open a profane play or poem; and my mother had no longer the opportunity to hear me read poetry as formerly. I found, however, in her dressing-room, where I slept at one time, some odd volumes of Shakespeare; nor can I easily forget the rapture with which I sat up in my shirt reading them by the light of a fire in her apartment, until the bustle of the family rising from supper warned me that it was time to ereep back to my bed, where I was supposed to have been safely deposited since nine o'clock."

Luckily this tutor's stern rule did not last long, and when a severe illness attacked the youth (then advanced to be a student at Edinburgh College) and brought him under his mother's charge once more, the bed on which he lay was piled with a constant succession of works of imagination, and he was allowed to find consolation in poetry and romance -those fountains which flow for ever for the ardent and the young.

It was in relation to Mrs. Scott's control of her son's reading that he wrote with gratitude late in life, "My mother had good natural taste and great feeling." And after her death, in a letter to a friend, he paid her this tribute: "She had a mind peculiarly well stored. If I have been able to do anything in the way of painting the past times, it is very much from the studies with which she presented me. She was a strict economist, which, she said, enabled her to be liberal; out of her little income of about £300 a year she bestowed at least a third in charities; yet I could never prevail on her to accept of any assistance."

#### WORDS OF THE WISE.

THOSE men who are commended by everybody must be very extraordinary men; or, which is more probable, very or, inconsiderable men.

THE great struggle of life is first for bread, then butter on the bread, and at last sugar on the butter. This is the best any of us can do. THE three things most diffi-cult arc-to keep a secret, to forget an injury, and to make yood use of labour.

PHILOSOPHY hath given us several plausible rules for at-taining peace and tranquillity of mind, but they fall very much short of bringing men to it.

A story goes that William IV. once said of this bed, "Why, you have not room to turn round in it." "When you think of turning round in the bed," replied the Duke. "It is time to turn out." 15.-Poggins relates of Dante, that he indulged bis nucditations more strongly than any other man le knew, whenever he read, he was only ally to what was passing in bis mind; to all human conterns he wonne went one day to a spreat when went one day to a spreat

# A MAN WHO PLAYED MANY PARTS.

YYE find a remarkable traveller, scholar, linguist, soldier, and adventurer in the person of the late Sir Richard Francis Burton. He was born in 1820, and was educated partly abroad and partly at Cambridge.

His earcer, however, at Cambridge was cut short by a frolic, which in these days, when true discipline has improved at the Universities, would not have been visited soverely upon him; and in consequence the intention that he should enter the Church was abandoned, and he was allowed to follow his own bent and become a soldier, though it was but in the service of John Company.

Here he showed at once how great was his power of absorb-ing languages. We have used the word "absorbing" instead of "learning," and we have done so purposely, for with each fresh language he attacked he studied such literature as it might possess, and also the manners and customs of the tribe or people speaking it; and in order to do this he lived among them as one of themselves, and developed rapidly a power of assimilating himself to Asiatic peoples and of following their trains of thought—in fact, of being able to think as they would think, in addition to thinking as a European. It soon became possible to him, therefore, to live among the people as if he were one of themselves, and without their suspecting that he was not an Indian but a "Sahib."

In the conquest of Scinde he was Napier's "Intelligence department," and for months and months his life depended

solely upon his disguise not being penetrated. It was here that he learnt the marvellous self-control which enabled him to perform the pilgrimage to Mecca and Medina. He is the only man who has performed that pilgrimage in disguise. Other Europeans have visited the holy cities, but they have done it after openly professing Mohammedanism; and though they might be suspected of not being very ardent Moslems, and be closely watched, they ran no extreme danger.

Burton, however, wanted to see all and everything, and, joining a band of pilgrims as one of themselves (he even left London in an Oriental disguise), he was able to see more accurately and more closely and clearly than any other who has written a description of the pilgrimage.

Stories have been told about him shooting a man during this adventurous journey in order to save his own life : these were made-up stories, and not only were they false, but it was also impossible for them to be true.

After the Crimean War, with his old companion Speke, we find him returning to Africa and proving the existence of the great lakes which at that time were only known to geo-graphers through the report of natives, and were represented on maps by a huge slug-like expanse of blue, occupying as much space as is now covered by the three Nyanzas, Nyassa,

and Tanganyika. "The story of that journey is known," says another dis-tinguished taveller, Commander Cameron, "but I may say, having been a follower in his footsteps, that if Richard Burton had never written anything but the 'Lake Regions of Central Africa,' he would have deserved well of his age and country. An unfortunate outcome of this journey was the severance of the intimacy between the two travellers. reasons of that severance it is not for me to discuss ; but often and often, when I have spoken to Burton about this journey and about Speke, he has spoken of him in the highest terms of praise, and has never said one word as to the unhappy difference between them."

Burton was our Consul at Fernando Po, and because he accepted that post while on leave, without consulting the Indian authorities, after twenty years of service, during which he had rendered matchless services, he had to leave the Indian Army without pension or reward. His work continued even in the depressing climate of the Bight of Benin, and his

born; And each must have his portion. Vulgar minds

Refuse, or crouch beneath their load; the brays Bear theirs without repining.

name is still held in affectionate memory by those who survive him who knew him there, though they are now but few in number

Philology occupied him here, and several volumes arc extant showing how insatiable were his industry and appetite for acquiring knowledge.

His minor travels, if they may be called by that name, include North America (California in the early days of the gold fever), with a visit to Salt Lake City.

One anecdote he was fond of relating was that he asked Brigham Young to allow him to preach in the tabernacle, Brigham Young to allow him to preach in the tapernacle, saying that he had become a Mornion. The elder, however, said, "No, captain, you don't play that game twice "---alluding to Burton having been selected to preach a sermen in the Mosque at Medina (this sermon being one of the great events of the complete pilgrimage), on account of his heing better acquainted with Moslem doctrines than his companions.

Iceland, a trip to Scinde, two journeys to Midlan in search of the ancient gold mines there for Ismail Pasha, Khedive of Egypt, and a trip to the Gold Coast, besides many other wanderings to and fro to Egypt, Algiers, and elsewhere, filled up much of his time.

"From 1872," says Commander Cameron, "though I sometimes corresponded with Burton, ever receiving from him the advice or information I needed, I did not see him again until we met at the Geographical Conference at Vienna in 1881. This was, indeed, a time in which to see him in his glory. Men of learning and of distinction from all civilised nations were there, and each found in his own language and on his own special subject that in Richard Burton he met a man whose opinions were worth having, and from whom he could learn much of value.

"But though his learning and attainments were beyond those of most men, Burton was not a Dryasdust philosopher. No man loved a joke better than he did, and no man under a somewhat rough and cynical exterior concealed a kinder or more loving heart. He could be as tender, as unselfish, and self-denying as a Sister of Charity, and was over ready to do a kind deed, though he never cared that his kindness should be noised abroad."

Judged by the world's standard, Richard Burton was not a fortunate or a lucky man, but he had the fortune to follow a life full of interest to himself; and though he did not reach the Psalmist's limit, he lived as long as a score of centenarians of baser metal. In one thing above all was he fortunate-in his wife, who was the one woman in the world who would have suited him, and whose devotion to him, her hero and her husband, was above all praise.

#### IF THAT HIGH WORLD.

If that high world, which lies beyond Our own, surviving Love endears; If there the cherished heart be fond, The eye the same, except in tears-How welcome those untrodden spheres ! How sweet this very hour to die ! To soar from earth and find all fears Lost in thy light-Eternity! It must be so : 'tis not for self That we so tremble on the brink ;

And, striving to o'erleap the gulf, Yet cling to Reing's severing link. Oh! in that future let us think To hold each heart the heart that shares, With them the immortal waters drink. And soul in soul grow deathless theirs !

#### WORDS OF THE WISE.

PRINCES are brought up to live with the world-all the world ought to be brought up to live with princes.

THERE are too many people who talk much about what a happy place Heaven is, who do not do a thing to make this world resemble it.

MANY persons criticise in order not to seem ignorant; they do not know that indul-gence is a mark of the highest culture

DISBELIEF in futurity loosens in a great measure the ties of morality, and may be supposed for that reason to be pernicious to the peace of civil society.

On October 16th, 1869, he wired to Stanley in these words: "Come to Paris on important business," and on the same day Stanley left Madrid for Paris- and fut bus great opportunity of his life. Spired between them, is more than a twice-toil taio, but its interest is such that the salient points of the interview cannot be omitted here. Stanley may well be allowed to tell the story in his own words, and in his own striking manner:--"On arriving at Paris in the dead of night, I went," he says, "straight to the Grand Hotel and knocked at the door of Mr. Bennett's room. Wilkie then gave the following explanation: "When you were drawing up the Statistical Account of Scotland, my father, who was a clergynan in Fife, had much cor-respondence with you respecting his parish, in the course of which you sent him a coloured drawing of a soldier, in the uniform of your Highland FencibleRegiment, I was so delighted with the sight that I was constantly drawing copies of formed into a painter."

BYRON.

# THE AUTHOR OF "NEVER TOO LATE TO MEND."

HARLES READE, the novelist, was a character of singular interest and originality. He was born at Ipsden House, Oxfordshire, on June 8th, 1814. He was descended on the father's side from King Henry III. and from King John, and on the mother's side from John Balliol, besides being connected by marriage with Charlemagne.

His father seems to have been a commonplace country Secti-Waring, the "jackal" of Warren Hastings. In some respects she was a devoted mother, but she was whimsical: when her children came home from school or college she loved them for a day, tolerated them for a week, and then devoutly wished they were out of the house. She was honey one moment and vinegar the next; and much as she loved the baby Charles, she loved her own whims and fancies more. She seems to have been a woman of some strength of character and originality-she "abominated the low wit of Dickens," but found "James, with his love-ladies, interesting "--and Charles Reade was no doubt right in boasting himself "his mother's son." She became an ardent Evangelical, was intimate with many distinguished clergymen of that school, and died at the age of ninety.

Charles Reade's first schoolmaster was the Rev. Mr. Slatter, of Iffley, a merciless martinet; his second was the amiable and indulgent Mr. Hearn, curate of Staines.

In 1831 he was elected to a Demy-ship at Magdalen College, Oxford. He read little (his tutor, by the way, was Robert Lowe, afterwards Lord Sherbrooke); but once a Deny, he could scarcely miss a Fellowship save by gross misconduct or stupidity. According to his report, it was his dependence on his Fellowship which prevented him from marrying.

He was called to the Bar in 1842, but never practised. An attempt to establish a trade in Italian violins was unsuccessful, aud for some years, though his income of about £330 should have sufficed for a bachelor, he was in serious pecuniary straits.

So early as 1835 he had begun to make notes with a view to writing fiction, but he did not set to work seriously until 1850. Then "I wrote," he says, "about thirteen dramas which nobody would play."

One of these luckless works brought him into contact with Mrs. Seymour, then an actress at the Haymarket. He called to read her a play, and was mortally offended by her asking, "Why don't you write novels?" She mistook his wrath for the pride of poverty, and sent him a £5 note; and thus began a thirty years' intimacy of a purely Platonic character.

Soon afterwards Tom Taylor's collaboration enabled him to mould the idea of Masks and Faces into actable form. The play was produced at the Haymarket in 1852; and from this time forward the story of his career resolves itself into a

this time torward the story of his career resolves itself into a list of his plays, novels, and controversies. He became known to the reading public in 1852 as the author of "Peg Woffington." This was followed in the suc-ceeding year by "Christie Johnstone." After these came the well-known work "It is Never too Late to Mend," "The Cloister and the Hearth," "Hard Cash," "Griffith Gaunt," "Put Yourself in His Place," and many others whose names are familiar to all readers of fiction.

A good deal might be said regarding Charles Reade's connection with the stage. Dramatic writing was his hobby; he loved it with all his heart and soul; and he loved it none the less because he was again and again defeated in his efforts to attain success. It was George Eliot's ambition to be recognised as a poet; it was Charles Reade's to triumph as a dramatist. In neither case was the wish completely granted. When the drama of It is Never too Late to Mend was first produced, it was a comparative failure; and it was only in

#### WORDS OF THE WISE.

HE who is virtuous is wise ; and he who is wise is good ; and he who is good is happy.

12th Month,

1896.

THERE are only two rules for good manners. One is, Always think of others; the other is, Never think of yourself.

IT is better to do the most triffing thing in the world than to consider a half-hour a trifle.

WE are doing a great deal toward making ourselves look old and ugly when we give way to worry and fretfulness.

NOTES TO THE CALENDAR.

We rise in glory as we sink in pride. Where boasting ends, there dignity begins.

twenty francs; here they are!" 17.-Beethoven was essentially a composer of instrumental mutic, and as such may be regarded as the ne plus ultra of absolute music, lis vocal compositions are few in comparison, although what there are of them are works of the great-est magnitude. But it would appear that his free spirit could ill bear the restrictions to which a com-post in this sub mile with the restrictions to which a com-voice; and accordingly the ful orchestra, with its in numerable combinations of tone and limitless powers of expression, hecame his favourite medium. All planoforte players owe a double debt of gratitude to Beet-hoven-in the first place, for pro-viding them with a supply of the greatest music; and in the second, greatest music; and in the second, for bringing about a great improve-ment in the construction of the piano. This instrument, as he found it, was widely different, with its thin wiry tone, to that of our day, and no little of the credit is due to our composer, who wrote many of his greatest works for it-works which require all the power and resources of our present instru-ments; and it is largely owing to the demands made upon the piano by Beethoven that its makers have been constantly striving to improve its mechanism in every possible way.

#### INGRATITUDE.

Blow, blow, thou winter wind, Thou art not so unkind As man's ingratitude : Thy tooth is not so keen, Because thou art not seen, Although thy breath be rude. SHAKESPEARE.

after years that it became successful, and repaid its author for the labour and anxiety bestowed upon it.

When Reade essayed theatrical management for the purpose of bringing out his own pieces, he invariably lost large sums of money. His one great financial success came late in life, in Drink, a free adaptation of L'Assommoir.

In his personal habits Reade was exceedingly eccentric. For example, he had a mania for buying all sorts of flotsam and jetsam, with the idea that they might "come in useful." On one occasion he purchased a stuffed horse's head, thinking he might utilise it in one of his plays, and placed it in his lumber-room, where it soon became moth-eaten.

On another he invested in a large number of knives and forks, which he secreted away, thinking to produce them afterwards triumphantly. "Seymour," he explained to a afterwards triumphantly. "Seymour," he explained to a confidant, "thinks of giving a party; so I've purchased this cutlery in case she may run short."

He was troubled with corns, and wore enormous boots. He was found by a visitor one morning with a whole wastepaper-basket-ful of new boots, which he had ordered wholesale after a pattern that took his fancy. His gingham umbrella would have delighted Mrs. Gamp.

He had the unstable temper of genius, and some of the controversics in which he engaged gave infinite merriment to both friends and foes. He went so far on one occasion as to write to the editor of a London daily paper, threatening that if his books were not more fairly dealt with he would order his publisher to withdraw his advertisements from the offending journal. One can fancy what terror the threat of the loss of a few shillings a month would have had upon the proprietors of a flourishing London paper, and the amount of ridicule to which the bare suggestion of such a thing exposed the irritable novelist. But Reade was incurable. He would keep pelting his peppery little notes at the head of anybody and everybody against whom he fancied he had a grievance.

Perhaps Charles Reade's intellect was not speculative, perhaps it had exhausted all its speculation in the "Sturm und Drang" period of early youth; but whether or not, his latter mood was one of untroubled faith in an All-Wise and All-Mereiful Father. "He believed in science," says Mr. Robert Buchanan, "as all sane men do; but he clung to religion, as all wise men must. He was not, until the very last, a churchgoer, and he had no regard for dogmas, however domineering ; but he was deeply and unobtrusively pious in this heart of hearts. Remembering what he was throughout all his days, I think that last epitaph of his, composed for his gravestone when he already felt the finger of Dcath upon him, one of the most toughing things that have ever been written by a strong man. It was as follows :-

#### " ' Here lies,

By the side of his beloved friend. The mortal remains of CHARLES READE. Dramatist, Novelist, and Journalist. His last words to mankind Are on this stonc.

"' I hope for a resurrection, not from any power in nature, but from the will of the Lord God Omnipotent, who made nature and me. He created man out of nothing, which nature could not. He can restore man from the dust, which nature can not.

" ' And I hope for holiness and happiness in a future life, not for anything I have said or done in this body, but from the merits and mediation of Jesus Christ. " ' He has promised His intercession to all who seek it, and He

will not break His word : that intercession, once granted, can not be rejected : for He is God, and His merits infinite : a man's sins are but human and finite.

""" Him, that cometh to me I will in no wise cast out." "If any man sin, we have an advocate with the Father, Jesus Christ, the Righteous: and He is the propitation for our sins."" "If "TO BEAR IS TO CONQUER OUR FATE."

# GOOD WORDS ARE WORTH MUCH.

"Words are the wings of actions."

#### CALUMNY.

BE thou as chaste as ice, as pure as snow, thou shalt not escape calumny.

THE FINEST ART. A BEAUTIFUL behaviour is better than a beautiful form; it is the finest of fine arts.

"I DON'T CARE."

THE man who doesn't care what people think of him, mustn't be surprised to find that they dou't think anything of him.

THE SHUT MOUTH.

IT appears to be an established truth that au ounce of keep-your-mouth-shut is better than a pound of explanation after you have said it.

BEST OF ALL.

To think kindly of each other is good; to speak kindly of each other is better; but to act kindly one towards another is hest of all.

#### INFLUENCE.

EVERY man, however humble his station or feeble his powers, exercises some iufinence on those who are about him, for good or for evil.

#### SENSIBLE CONDUCT.

In taking revenge, a man is but equal with his enemy; but in passing it over he is superior.

#### GOOD LOOKS.

GOOD-NATURE is more agreeable in conversation than wit, and gives a cer-tain air to the coun-tenance which is more amiable than beauty.

#### ADVERSITY.

HE that has never known adversity is but half acquainted with himself or with others. Con-staut success shows us but one side of life; for as it surrounds us with friends who tell us only of our merits, so it silences those from whom alone we can learn our faults.

#### IMAGINATION.

HAPPY moments live

more frequently in me-mory than in reality. If we look forward and ex-pect them, we also look back through the haze of distance upon golden hoars of unalloyed upon golden hours of unalloyed delight. Imagination is a kindly faculty, and helps us to forget what we do not care to remem-ber: it fools us so pleasantly that we have no wish to disturb its illusions. Half the discon-tent of the world would be cured if our inneghations were only obcured for play allowed fair play.

DUTY

EVEEY duty we omit obscures some truth we should have known.

LIVING FOR SELF.

THE man who lives only for himself is engaged in very small husiness.

#### PROVERBS OF AFFECTION.

PROVERES OF AFFECTION. Hol low is soon cold. Faults are thick where low is thin. Where pride begins, low coases. Low end a courh work thide. Sweet is the lowe that meets return. The heart's latter is read in the eyes. Low and lordship make no fellow-ship. Lowe ties in cottages as well as in courts. The remedy for low is-land between. Kind confidence begets confidence, and low begets lowe. Abscice shoppens low, presence strengthens it. the husband, wisdom; in the wife, gentleness. Nobling is more tender, mothing more violent, than love. The science of love is the philosophy of the heart. Low cannot be bought or sold; is only price is lowe.

#### CARE.

CARES will come, but it is not God's intention that we should keep one of them over night. 1

#### A CODE OF MORAL VIRTUES.

The following code of moral virtues was drawn up by Dr. Franklin for regulating his life :-

Temperance .- Eat not to fulness : drink not

Temperance.—Eat not to fulness ; drink not to elevation. Silence.—Speak not but what may benefit others or yourself; avoid triffing conversation. Order.—Let all your things have their place; let each part of your business have its time. This perform without fail what no resolve. Trigality.—Incur no expense but to do yood to others or yourself.—Hat is, wats enthin. Industry.—Lose no time; be always employed an something useful; avoid all unnecessary actions.

Sincerity,—Use no hurtful deceit; think innocently and justly; and if you speak, speak

Justice, -Wrong none by doing injuries or omitting benefits that are your duy. Moderation, -Avoid extremes; forbear re-

senting injuries. Cleanliness.—Suffer no uncleanness in body, clothes, or habitation.

Trauquillity .- Be not disturbed about trifles. at accidents common or unavoidable. Humility .- Imitate Jesus Christ.

#### WINNING AND RETAINING.

WE attract hearts by the qualities we display; we retain them by the qualities we possess.

#### BELIEF.

FINDA man who is moving the world, and you will find a man who believes something. A man ou the fence has no moral weight.

-----

#### A HARD MASTER.

WHEN you want a hard master, work for a beggar who has just become rich.

LEADING OTHERS.

THE important thing, if you would lead others, is to go that way yourself.

#### IN LOVE.

IT is with bachelors as with old wood, it's hard to get them started, but when they do take tame they burn prodigiously.

#### MOTIVES.

NEVER judge and con-demu another hastily, for if you do you may judge wrongly. Attribute a good motive to others when you can.

#### THOSE WE DISLIKE.

IF there is any person to whom you feel dislike, that is the person against or of whom you ought never to speak.

#### GIVING.

WE should give as we would receive, cheerfully, quickly, and without hesitation; for there is u o grace in a benefit that sticks to the fingers.

#### DEEDS OF LOVE.

WHAT wonders love cau WHAT wonders love cau dol How the meanest, the most loathsome, touched by love's fine hand, be-comes a service all re-verent and beautiful.

#### LANGUAGE.

WHEN the language in common use in any coun-try becomes irregular and depraved, it is followed by the ruin of its citizens, or their degradation. For what do terms used with-out skill or meaning, which are at once corrupt and missurblied. denote and misapplied, denote, but a pcople listless, supine, and ripe for servitude ?

#### COURTESY.

KNOW thou that court-esy is one of God's own properties, who sendeth His rain and His sunshine His fain and firs someone upon the just and upon the unjust, out of His great courtesy is the sister of charity, who bauishes charity, who hatred and cherishes love.

#### SELF-RESPECT.

THE same self-respect which prevents an honourable man from provents an nonourinte maturioun doing in secret that which he would be ashamed to do openly, should also prevent him from tolerating within himself a single wish which his best judgment disapproves, or his highest moral conception repudiates.

# THE FRIENDLY COUNSELLOR.

"Good counsellors lack no clients."

#### FOOLISH FASHION.

LADIES of fashion starve their happiness to feed their vanity, and their love to feed their pride.

#### FAULTS.

TEN thousand of the greatest faults in our neighbours are of less consequence to us than one of the smallest in ourselves.

#### ODESTIONS AND ANSWERS.

Wino is wise? He that learns from everyone.—Who is powerful? He that governs his own passions.—Who is rich? X.— He that is content.

IN EARNEST.

IN EARNEST. Don't live a single hour of your life without doing exactly what is to be done in it, and going straight through it from beginning to end. Work, play, study, whatever it is, take bold at once and fluish it up squarely and clearly; then do the other thing, with-out letting any moments drop between.

#### AT HOME.

Do not seek to get away Do not seek to get away 745 from the common, every-day things of life. In them is found the happiness and peace of mind that, it may be, you are looking for in opportunities and circumstances which lie in times and the sour far temporad and places now far removed

#### SPECULATORS.

SPECULATORS. SEARCH through the world, visit every clime, examine every nation, and you will never find a speculator esteemed or beloved; they may com-nand outward respect and friendship or affectionate attacliment. they are attachment; they are human sharks, and happy are the smaller fish if they can keep out of their devouring grasp.

#### ERRONEOUS WAYS.

ERROYROUS WAYS, IT is a great misfor-tione that people so com-mouly annuse themselves with idle and imaginary sciemes-how they would behave, and what they would do, were they in such or such a situation. They would be very good and very exemplary were they very great, very \*

and very examplary were they very great, very learned, very wealthy, very re-tired, very old, and the like. But they neglect the gift which is in them, and the work which is an-pointed for them, while they are thinking of that which is not. Alasi that man's thoughts should be so taken up with dreams and reper they in another station, while the coifer wisdom of life consists in the assidoum dis-charge of those duites which belong to their own proper calling.

#### SUFFERING.

THE heart that has not suffered has not loved.

WEAK POINTS.

SELF-CONSCIOUSNESS and affectation are the besetting infirmi-ties of the literary temperament.

#### TIME

IME by moments steals away. First the hour and then the day: Small the daily loss appears. Yet it suon amounts to years.

#### WISDOM IN FEEDING.

No economy without efficiency. All sweets are not wholesome. Eat-well is drink-well's brother. Eat-well is arink-well's browner, Long fasting gains no meat, The best fish is the one that's caught. Ill beef never made a good broth. Hunger will break through stone walls, The stomach hates long sermons, The estimate hates (ong sermins, There is reason in the roasting of eggs, All meat is bad to a full stomach, Who dainties love shall beggars prove, Pride is as loud a beggar as want, und a great deal more saucy.

TRUST NOT. TRUST not the praise of a friend, nor the contempt of an enemy.

CLOSELY CONNECTED. GOOD conscience and a good temper are intimately counected.

#### MAXIMS FOR HOUSEKEEPERS.

Every bee's honey is sweet. The house showeth the owner. He that is at ease sceles dainties. It climits at ease seeks autimities, Anger at a feast betrays the boor. In a good house all is quickly ready. Everything is of use to a houseleeper. As the year is, so must your pot seethe. Many a good dish is spoiled by an ill sauce. The biggest calf makes not the succelest veai. Never haggle about the basket if you get the fruit. He that saveth his dinner will have the more supper. There is winter enough for the snipe and woodcock too. Squeeze not the orange too hard, lest you have

a bitter juice.

When the stomach chimes the dinner-hour, don't wait for the clock. They who have little butler must be content to spread thin their bread.

WITHOUT MIND. DAHLIAS are like the most beautiful women without intelbenufful women without infel-lectuality-they strike you with astonishment hy their extreme splendour, but are miserably des-titute of those properties which distinguish and render agreeable less important flowers. Had Nature given the fragrance of the rose to the dahlia, it would have been the most werreideaut con in the the most magaificeut gen in the garden; but, wanting scent, it is like a fine woman without mind.

#### HE NEVER GETS THERE.

THE man who would have done so and so if he had been there, never gets there.

#### FORGIVENESS.

LET us be forgiving, remember-ing on how many occasions we ourselves need to be forgiven.

#### FIRE

FIRE is a good thing in the house; but it should be in the chimney, and not in the wife's temper-cooking victuals, 257 not roasting the husband.

#### USEFUL OPPOSITION.

A CERTAIN amount of opposition is a great help to a man. Kites rise against and not with the wind. Even a head-wind is better than none. No man ever worked his pas-sage anywhere, in a dead calm.

#### TOIL.

tota. If you want knowledge, you must toil for it, if food, you must toil for it, if and if pleasure, you must releasure comes through toil, and not by self-indulgence and indolence. When one gets to love work, is if if is a happy one.

#### CHARACTER.

INSTEAD of saying that man is \*

the creature of circum-stauces, it would be nearer the mark to say that man is the architect of circumstance. It is character which builds an existence out of circumstance. Our strength is measured by our clastic power.

#### LITTLE THINGS.

CLOSE attention must be given in business to the slightest details, and everything has to be done carefully. The cost must be uncasured in every transaction. Application is necessary if you would attain the best results, Look out for the little the court of the little the court of the little the court of the little court the bime, but every item helps to count up on either side of the bahauce-sheet. CLOSE attention must balance-shcet.

GENIUS AND GOODNESS.

GENIUS AND GOODNESS. "I HAVE sometimes," says Victor Hugo, the famous French novelist, "had at one and the same time in my two hands the gloved and white hand of the upper class, and the heavy black hand of the lower class, and have recoguised that there is but one man. After all these have passed before me, I say that Humanity has a synonym-Equality; and that under Heaven there is but one thing that one should how to -Genuis; and but one thing that one should kneel to-Gooduess."

"THE WORTH OF A THING IS WHAT IT WILL BRING."

#### THE CELANDINE.

Pansies, lilies, king-cups, daisies, Let them live upon their praises; Long as there's a sun that sets,

Long as there is a sun that sets, Primroses will have their glory; Long as there are violets, They will have a place in story. There's a flower that shall be mine, 'Tis the little celandine.

See its varnish'd golden flowers Peeping through the chilling showers.

- Ere a leaf is on a bush In the time before the thrush Has a thought about its nest
- Thou will come with half a call,

Spreading out thy glossy breast, Like a careless prodigal; Telling tales about the sun, When we've little warmth or none.

Comfort have thou of thy merit, Kindly unassuming spirit ; Careless of thy neighbourhood,

Thou dost show thy pleasant face. On the moor, and in the wood, In the lane-there's not a pluce,

Howsoever mean it be, But 'tis good enough for thee.

## "SHE WAS MINE."

- Others of comely face and life. Others of chaste and warmth
- there are. And when they speak they seem to
- sing : Beyond her sex she was not wise;
- And there is no more common thing
- Than kindness in a woman's cyes.
- Then wherefore weep so long and fast
- Why so exceedingly repine ?
- Say, how has the beloved surpass'd So much all others?" "She was mine.

#### INTEREST TABLE.

Without giving an elaborate series of tabulated figures to as-certain the interest due on any given sum at 21, 3, 5, or any other rate per cent., any person may cal-culate for himself the innount of interest by a very simple process. The amount of interest upon one

retained what any given sum amounts to at 5 per cent. is one penny, Having as-certained what any given sum amounts to at 5 per cent., other rates may be calculated by adding to, or dividing it, thus: 6 months.

5 per cent.for £80 would be£2 0 0 23 per cent., which is one-half ......

8 per cent. is six-tenths ň 3] per cent. is seven-tenths 1. 1 4 4 per cent. is four-fifths .. 1 12 1 f the interest should be more

than 5 per cent, then the extra rate of interest must be added. Thus for 64 per cent. add one-fourth; for 74 per cent. add onehalf.
